

IXT-100

IndusX T100

Smart Temperature & Humidity Monitoring Device

Industrial-grade temperature and humidity monitoring for cold chains, clean rooms and server rooms.

IndusX T100 is a temperature and humidity transmitter and data collector built for mission-critical environments, where a missed excursion means lost product or failed compliance.

Temp RH Alarms

SPECIFICATIONS

Measured parameters	Temperature · Relative humidity
Display	On-device screen
Connectivity	Cloud connected
Analytics	Connix Xview – trends, alarms, remote access
Series	IndusEdge – Industrial Monitoring Solutions

KEY FEATURES

- Real-time monitoring
- Cloud connectivity
- Historical trends
- Alarm management
- Remote accessibility
- Industrial-grade design

APPLICATIONS

- Data centres & server rooms
- Food processing QA
- Manufacturing process control
- Greenhouses & controlled farming
- Pharma clean rooms & GMP
- Cold storage & vaccine storage
- Warehouses

Electrical, environmental and enclosure ratings are in the full datasheet — request it at www.connix.in/products/indusx-t100/
