

WXC-100

WaterX C100

Smart Water Quality Analyser

Continuous multi-parameter water quality monitoring for treatment plants, municipal networks and industrial process water.

WaterX C100 measures the parameters that matter for water quality and compliance and streams them to Connix Xview, so operators see every site in real time instead of waiting on manual samples.

pH / DO

7 parameters

Cloud alerts

SPECIFICATIONS

Measured parameters	pH · Turbidity · Conductivity · TDS · Dissolved Oxygen · ORP · Temperature
Monitoring	Continuous, remote
Analytics	Connix Xview – dashboards, alerts, reports
Series	AquaAir – Water & Environmental Intelligence

KEY FEATURES

- Seven water quality parameters from a single analyser
- Continuous remote monitoring — no manual sampling rounds
- Threshold alerts for compliance excursions
- Historical trends and reports in Connix Xview

APPLICATIONS

- STP monitoring
- ETP monitoring
- Water treatment plants
- Municipal water networks
- Reservoir monitoring
- Borewell monitoring
- Industrial process water
- Drinking water compliance
